Frequently Asked Questions

Supported Living

What does supportive living mean?

Our supportive living program provides services to people with disabilities around their specific needs. Two or three individuals with a disability will share an apartment or a house in the community. Individuals may require services 24 hours a day or may only need a few hours or services a week.

What different areas can an individual receive services with 24 hour care?

Grocery shopping, cooking skills, budgeting, hygiene skills, communication skills, doctor's appointments and outings in the community.

If I live with someone can I still receive services?

Yes, you could possibly qualify for less than 35 hrs a week.

What if I need emergency services and I am not on a DD or SS wavier?

The state could approve you for ICLB funding and that would pay for your services until you obtain a wavier.

What does a client do about deposits and the need for furniture when they first move into supportive living?

When you first move into supportive living you request ICLB for \$1000.00 for start up money and this can be used for furniture and deposits. This is a one time occurrence.
