Behavior Management Services supports individuals to use positive strategies to decrease the occurrence of behaviors. Utilizing Behavior Management Services can enhance an individual's quality of life by increasing their independence and meaningful participation in the community.

New Hope Services' Behavior Specialist partners with clients, staff, and family members to provide hands on training to promote success and decrease the number of challenging or dangerous behaviors. Behavior Management Services are funded through the DD, SS, or Autism Medicaid Waivers.

Karen Winchell, MSSW serves as New Hope's Behavior Specialist and has over 7 years experience working with individuals with disabilities and behavior support plans.
